THE OPTION ON THE LEAD MINE.

Sold on the Exchange from \$1.01 P. T. Farnsworth and Others Take Over the Co's Holdings Today.

DALY-WEST WAS STRONG. STRIKE IN THE OPHIR MINE

Mammoth Advancing-Dexter Stiffen. Several Feet of High Grade Silver and Gold Ore-Preparations for an Independent Smelter.

> Late this afternoon the finishing touches were being put on the Dalfon & Lark deal. The sum of \$5,000 was put up yesterday afternoon, and it was stated this afternoon by Hon. P. T. Farnsworth that the balance would be Farnsworth that the balance would be placed to the credit of the Lead Mine company of Bingham. The balance amounts, with interest, to \$51,132. On the payment of this sum, Mr. A. Hanauer of the Lead Mine company will surrender the deeds to some twenty claims owned by the Lead Mine company. With the deeds, the ownership of 1,000,000 shares of Dalton & Lark stock will also pass to Mr. Farnsworth. The payment of the above sum does not represent the real value of the Lead Mine property. It represents ead Mine property. It represents by the balance due on the option on the company's property, formerly held by the Dalton & Lark company. This option was for the sum of \$175,000, all of which was paid but \$52,000, the in-terest on which has caused the bal-ance to reach the sum of \$56,132 today. ance to reach the sum of \$56.132 today. It was also expected that Mr. Farnsworth's option on the Dalton & Lark holdings would be taken up today and a final adjustment made with Mr. Schenk of that company. Two well known local mining men have figured in the closing of this important deal, in which Mr. Farnsworth has been assisted by Willard Snyder, who brought the Annie Laurie of Gold Mountain to the notice of the Kimberley people.

STRIKE IN THE OPHIR. Several Feet of High Grade Ore Found in West Drift.

Manager M. L. Effinger, of the Opher, at Stateline, came up from that property today with a 20-pound chunk of ore from the latest strike in the west drift off the 100-foot level. The ore is splendid looking stuff, showing plenty of gold and silver. Some horn silver and free gold are also present. Assays and free gold are also present. Assays show a value of 600 ounces silver and \$60 gold per ton. The company has several feet of similar rock in sight. A shipment of several tons of ore running several hundred ounces in silver is on the way to market. The shaft is now down 300 feet.

Foreign Capital.

Over the names of Richard Terhune and S. L. Boggs' type-written prospec-tuses for a new smelter company are being circulated among mining men of this city. The value of such an incorporation are set forth therein by figures which show the gradual increase in the which show the gradual increase in the mineral production of this State. It is estimated that the mineral output of 1900 will exceed that of 1899 by over \$7,000,000. This being so it would appear that the chances for an independent smelter being operated with profit are very good-provided that such a company has the financial backing. It company has the financial backing. It would appear that this new company will have all that is needed in this respect. In speaking of the matter today Mr. S. L., Boggs, who is standing at the financial end of the scheme, said that bankers in New York, Boston, London, Paris, Frankfort, Berlin and Hamburg were co-operating in the matter. Within the next thirty days, Mr. Boggs says, the company will be incorporated under the laws of Utah with a capital stock of \$2,500,000, shares of the par value of \$1 per share, fully paid and non-assessable. It is proposed to build a multiple smelter of 500 tons daily capacity, which will treat all kinds of eacity, which will treat all kinds pacity, which will treat all kinds of gold, silver, lead and copper ores. The refinery will also have a yearly capacity of 35,000 tons of base bullion. The plant, it is said, will be modern in all its appliances. The site has not yet been selected, but Mr. Boggs says several have been proposed and are now being considered. It may be built to the east of Sandy, where Col. Heffron says one of the best Smelter sites in the valley is obtainable. ley is obtainable,

STAR CON. ORE.

Five Cars Settled For Today Bring \$24 Per Ton.

W. J. Lawrence visited the Star Con-W. J. Lawrence visited the Star Consolidated last evening and reports the property looking well. Little is being done on the 400 owing to the inability of the company to handle the ore at the present time. Another visitor to the property reported today that a streak of ore going 200 ounces in gold had been uncovered on the 400-level. In regard to this report Mr. Lawrence said that while some very rich samples were thile some very rich samples were ound the average was not more than we or six ounces, A shipment of eight ars is being loaded. Mr. Packard settled for the last shipent of five cars today, which netted \$24 per ton.

ADVANCE IN SILVER.

Several Reasons Why it is Probable

that the Price Will Go Higher. Silver advanced to 63% cents per unce, the highest price paid for many ears. According to Western Manager J. Grant of the American Smelting and lefining company, the price of silver likely to advance further before the

ose of the year.
"There has been a decrease in the roduction of silver," said Mr. Grant to Denver Post reporter, "of about 400,0 ounces as compared with 1898, in the United States and Mexico, the two ringinal silver-producing countries. he United States and Mexico, the two rineipal silver-producing countries. Inis decrease was about equally divided between them, say 200,000 ounces ach. That decrease still continues. In the meantime the demand has not allen off, but has increased to some exent, and these circumstances account or the rise. I think that is about all here is to it. The increased demand a probably due to the increased world's inclivity, especially in Europe. The producer gets the benefit of the rise, as he settlements of the smelters are made daily on the eastern current quarations."

In some respects also there is a belief among those who are familiar with the market for silver, that the control of the American and Mexican supply by three sources of sale has stimulated the advance. It has been the custom of the smelter men for a year past to

chases were inclined to lower prices, and since the principal smelting plants were amalgamated under one management it has been possible for them to carry out this plan more effectively

han ever before. Therefore when European countries came into the market recently for the bullion for coinage for use in the Orient, they were compelled to pay the price asked by owners of stocks in the United

States.
The United States government is said to be buying no silver whatever, but is coining the stocks acquired at about 90 cents an ounce, previous to the repeal of the Sherman bill. When that supply is exhausted, as is expected in about three years, the United States must come into the market again, and this fact is cutting a ma-terial factor in the predictions of those best posted, that the price will gradu-ally advance if the activities of the vorld continue to increase as now, under inspiration, due largely to the in-creased production of gold and the prospective development of the natural resources of the Orient by Europeans and Americans and Americans.

AN ENORMOUS TONNAGE.

Handled by the American Smelting

Company During the First Year. The following particulars regarding the business done by the American ting and Refining company during the first year are interesting as showplants was, in round figures, 1,500,000 tons; the fuel used was 500,000 tons and the flux 400,000 tons. The bullion refined was 163,000 tons, so that the total smelting charges amounted to 2,662,-

The output of the refineries for the The output of the refineries for the year was 1,200,000 ounces gold, 40,500,000 ounces silver and 100,000 tons lead. The total value of these products was \$64,000,000, of which the gold constituted nearly \$25,000,000. The value of the refined products was about \$4,000,000 more than that of the output of the same plants in the preceding year. The average value of the ores smelted was average value of the ores smelted was about \$43 per ton, and the profit realized by the company was only about \$2 per ton smelted and refined. For the single item of wages the company paid out \$4,000,000 at its different plants.

It is evident that the American Smelting and Refining company has thus far followed in its business the course which was outlined for it when the consolidation of its various plants was completed. It has sought, by moderate charges and in other ways to encourage the production of ores, while assume its own resitten and profits by suring its own position and profits by working as economically as possible and on a large scale. The result thus far has evidently been satisfactory.

RICH IDAHO PLACERS.

Millions of Acres of Rich Ground Unprospected at Head of Clearwater.

William H. Meyers and V. A. Buchanan returned home this week from their prospecting trip on the headwaters of the Clearwater, some 150 miles southeast of Mulian, says the Alia (1da.) Area. Mr. Meyers says his party located some very promising ground just beyond the Crawford-Bean placer AN INDEPENDENT SMELTER.

Salt Lake Men Said to Have Secured

Salt Lake Men Said to Have Secured

Salt Lake Men Said to Have Secured lo work, having run a mile or more of ditch, constructed a reservoir, and got a good hydraulic ready to operate, From one small piece of ground which From one small piece of ground which he saw sluiced off to bed rock, an ounce and a half of gold was saved. Messrs, Meyers and Buchanan will not return until spring. Mr. Meyers says there are millions of acres of apparently rich placer ground in that country that has never been prospected. The new camp is some 50 miles beyond Moose City, once a rich placer camp of 1500 inhab. is some 50 miles beyond Moose City, once a rich placer camp of 1,500 inhabitants. Forest fires and time, says Mr. Meyers, have left a desolate city of ruins. The ground was long ago deprived of its golden treasure, and its only inhabitant is an occasional prospector. Fish lake, located in the vicinity of the new diggings, furnished the party plenty of fine trout. Mr. Meyers says the lake is two miles wide by four miles long and probably a mile deep.

MINING NOTES.

The Red Wing of Bingham had a car of ore on the market today. A car of ore was on the market to-day from the Carisa of Tintic.

Thirteen cars of ore from the Ophir Hill were on the market today. Superintendent G. B. Sessions of the Silver Shield was in from Bingham to-

It is reported that the capacity of the concentrator at Senator Clark's Ophir Hill mine is to be doubled. The Daly-West Anchor suit comes up

at Coaiville tomorrow. A number of experts left for the scene today. The Taylor-Brunton sampler report-

ed one car of ore from Tintic, thirteen from Stockton and one from Bingham Newt. Dunyon came up from North Tintic last evening. He reports some lead and iron in the shaft from the

Hernan tunnel

SUCAR STOCKS ATTACKED.

Cut in the Price of Granulated Causes a Drive at Sugar,

General Upward Movement in Stand. ard Rallway Stocks, Wiping Out the Early Losses.

New York, Oct. 3.—The feature of the opening dealings in stocks was a break of two points in sugar, under offerings of large blocks induced by the cut in prices of granulated sugar. This had a depressing effect elsewhere in the

Uneasiness as to the forthcoming dividend action on Tennessee coal, combined with short selling, dropped the price 3½ to 49, the lowest of the year. Heaviness in the coalers then devel-oped. There was a sharp decline in Missouri Pacific and New York Central. Towards 11 o'clock, sugar was attacked anew, and fell to 1144, on re-ports of fresh cuts in prices by opports of fresh cuts in prices by opposition refiners. A general upward
movement occurred in the standard
rallway stocks, which wiped out the
early losses and put the list above
yesterday's close, some of the railroads
rising about a point net. Some of the rising about a point net. Some of the specialties tended upwards, but sugar and Tennessee coal were feverish and

Bonds were quiet and irregular. A rumor that the coal strike was called off lenghtened out the advance, of a point. Sugar and People's Gas then moved upward, and prices at some points elsewhere scored the best. The market closed active and strong

FEDERAL COURT.

C. Schoer, has filed suit in the United States court for \$20,400 damages against the Southern Pacific company. The case was transferred from Brigham City. Schoer brings this suit as administrator of the estate of H. A. Schoer, who was killed in a wreck near Terrace, last December while employed by defendant company as locomotive fireman. The complaint alleges that there were two sections of a bassenger train running on the track, and deceased was on the second section. There was a rear end collision alleged to have been a rear end collision alleged to have been brought about through the negligence of the defendant company in failing to warn the second train of the close proximity of the first. Schoer was scalded in the collision and died from its effects the next day. December 22, 1829.

The most dainty and effective pills made are DeWitt's Little Early Risers. They are unequaled for all liver and bowel troubles. Never gripe. F. C. Schramm.
